

Classic Oils

With the Classic Oil product line, Kroon-Oil offers a complete range of lubricants specially developed for classic vehicles. With more than a century of experience, Kroon-Oil knows better than most which standards these products have to meet. Based on this knowledge and available technologies, the Classic Oils have been compiled. The Classic Oil products meet the original specifications, which guarantees safe and optimal lubrication for classic vehicles.

The Kroon-Oil Classic Oils are supplied in traditional tins, for which a new Classic logo was designed with a nod to the past.

Motor Oils

Modern motor oils are unsuitable for older vehicles because they have been designed for a completely different purpose. Modern motor oils for example are designed for lower fuel consumption, emission control and longer oil change intervals. The Kroon-Oil Classic Motor Oils have been developed with the current technology baseproducts, however completely adapted for use in classic vehicles.

The Classic Motor Oils range includes products for virtually all classic cars, from vintage to youngtimers. Besides several single grade and multi grade products, the range contains a special synthetic oil for use on the circuit. The range also contains running-in and conservation oil.

Transmission Oils

Classical transmissions come in various types varying from simple light transmissions with straight cut gear to synchronised transmissions with spiral bevel gears to heavy-duty hypoid transmissions with or without controlled slip function.

Whatever type of transmission your classic car has, with the Kroon-Oil Classic Gear Oils, your car is in safe hands. For virtual every classic transmission there is a suitable Classic Gear Oil in our range. Besides the various hypoid and medium-EP doped singlegrade transmission oils the range also includes mild-EP doped and non-doped single grade transmission oils.

ATF

The reliability and the level of comfort during shifting is mainly determined by the composition of an ATF. Friction improvers in an ATF provide a controlled amount of slip during shifting.

The friction characteristics of the Kroon-Oil Classic ATF's, Classic ATF-A and Classic ATF-F, are accurately adapted to the friction materials that were used in automatic transmissions by manufacturers at that time. This will guarantee comfortable and reliable shifting in your classic car with Kroon-Oil Classic ATF's. Besides that, the Classic ATF products are suitable for use in classic power steering systems.

WWW.KROON-OIL.COM, A GOOD ADVICE!

- » Compatible with classic sealings and rubbers
- » No danger for soaking off the caked dirt
- » Lower concentrations of detergents and dispersants
- » No limited ZDDP levels
- » ATF with special friction improvers for classic cars

Kroon-Oil "Classic Oils" a complete range of classic lubricants

Motor Oils

Vintage Monograde 30	Single grade motor oil without EP additives for classic combustion engines	API SA	34528
Classic Monograde 30	Single grade motor oil for classic combustion engines	API SF/CC	34534
Classic Monograde 50	Single grade motor oil for classic combustion engines	API SF/CC	34535
Classic Multigrade 10W-30	Multi grade motor oil for classic combustion engines	API SF/CC	34536
Classic Multigrade 15W-40	Multi grade motor oil for classic combustion engines	API SF/CC	34537
Classic Multigrade 20W-50	Multi grade motor oil for classic combustion engines	API SF/CC	34538
Classic Racing Oil 15W-50	Semi-synthetic motor oil for classic car sports	API SJ/CF	34539
Preservative Monograde 30	Special motor oil to preserve combustion engines		34541
Running-In Monograde 30	Special motor oil for running in overhauled combustion engines	API SE/CC	34542
Flushing Oil	Special motor oil to flush combustion engines		34543

Transmission Oils

Vintage Gear 90	Single grade transmission oil without "extreme pressure" additives	API GL-1	34544
Classic Gear EP 90	Transmission oil with medium EP additive for classic transmissions and differentials	API GL-4	34545
Classic Gear EP 80	Transmission oil with medium EP additive for classic transmissions and differentials	API GL-4	34546
Classic Gear MP 90	Hypoid transmission oil for classic transmissions and differentials	API GL-5	34547
Classic Gear LS 90	Special "limited slip" transmission oil for limited slip differentials	API GL-5 LS	34548
Classic Gear ZC 90	Mild EP added transmission oil for classic transmissions	API GL-3	34549

ATF

Classic ATF A	Special oil for automatic transmissions and power-steering systems	GM Type A, Suffix A	34550
Classic ATF F	Special oil for automatic transmissions and power-steering systems	Ford M2C 33-F/G	34551
